

Website Storyboarding Project

Here are the two options for your website storyboard:

1. Career Website

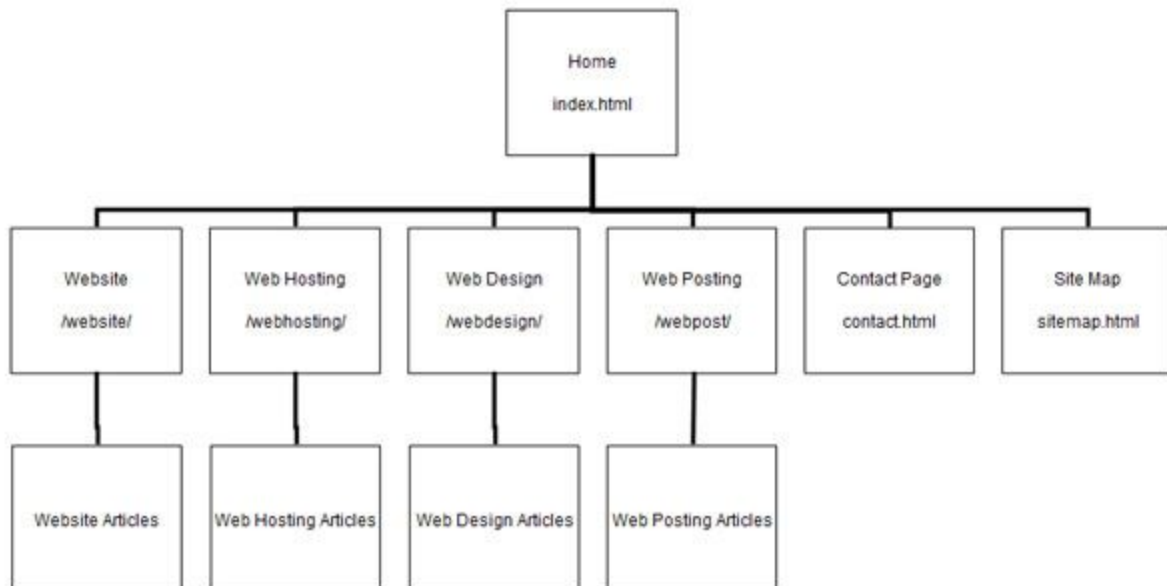

- a. Research a career and create a website that provides information about it. The website should include pages that:
 - Provide a brief description of the career
 - Explain the education required
 - Describe tasks performed in the career, salaries and how computer science is used in the career.

2. Worldwide or Community Problem Website

- a. Research a worldwide or community problem and create a website that provides information about it. The website should include pages that:
 - Provide a brief description of the problem.
 - Explain how the problem is affecting people.
 - Describe possible solutions to the problem and what people reading the website can do to help solve it.

Requirements

- Build a sitemap

- Create the user flow and design the user experience

- **Draft the visual design**
- **Outline the functionality of the site**

Tools to use

- Google Slides
- Keynote
- Mockingbird <https://gomockingbird.com/home>
